Experience

VetSuccess @ DEVersity

2021 - present

DevOps engineer. AWS, Terraform, networking, infrastructure, Docker. Ruby as main programming language - combining DevOps and coding is my sweet spot.

DEVersity

Jan 2021 - 2021

Viewpoint merged with DEVersity. Continued on existing projects plus new ones. Biggest was CDT (Centar za digitalnu transformaciju) - handled all infrastructure and backend. Laravel backend, Linux servers built from scratch.

Viewpoint

May 2019 - Jan 2021

Started as a Laravel dev, ended up deep into Linux, Docker, networking, CI/CD. Self-hosted GitLab on a Linode box, AWS for S3 and some Lambda functions.

Projects: volimpivo.rs, receptoteka.rs, quizzes for League of Legends and Redbull, internal app for Coca Cola Hellenic, Difol webstore, and others.

Reves Technologies

Oct 2018 - Apr 2019

Junior dev. Web scraping app - Laravel on Heroku, NodeJS, and PDF scraping/generation in C.

Skills

DevOps / Infrastructure: AWS, Terraform, Docker, GitLab CI/CD, Semaphore CI, Linux, Nginx, Networking

Languages: Ruby, PHP/Laravel, C, JavaScript/NodeJS, SQL, HTML/CSS

Platforms: AWS, Hetzner, Linode, Heroku

Education

ICT College of Vocational Studies (2014 - 2017) - Bachelor's degree

High School of Telecommunications Engineering (2010 - 2014)
